

20 Maintenance Matters

New Springfit mask

JSP has announced it has launched the new Springfit fold flat disposable mask with a unique endoskeleton structure which guarantees each mask keeps its shape, increasing performance and maintaining rigidity and says this integrated spring feature allows facial movement ensuring the mask offers a secure face fit and seal during speech or movement of the jaw.

JSP says the pioneering Typhoon valve has been designed to reduce breathing resistance, heat and moisture build-up. The valve is unaffected by any moisture, and therefore maintains high performance levels even at very low temperatures (-40°C tested).

ISO 9001:2015 certification

RILEY SURFACE WORLD is a leading reseller of new and used surface finishing plant and machinery. The company has been trading since 1966 and operates from 5000 square metre premises in Aldridge, West Midlands. In recent years, Riley says it has invested heavily in technology and people in order to become a global force in the surface finishing industry and the next logical step was to achieve ISO 9001:2015 certification to move the company to a different level. The certification assessment programme was overseen by Riley site director Dave Smith, who has a strong background in the implementation and monitoring of ISO standards.

F&G range of helmets

ESAB WELDING & CUTTING PRODUCTS reports it has unveiled its F&G range of helmets, the F20, G30, G40 and G50, which uniquely cover welding, cutting and grinding applications with their flip-up visor design and says from the simplicity and high protection level of the F20 to the versatility of the G30 and the large inner visors of the G40 and G50, the F&G range of helmets is ESAB's most versatile welding and grinding helmet solution.

All models come with an "Air" option, indicating an optional ESAB PAPR (Powered Air Purifying Respirator).

Training and consultancy services

RRC will be attending The Health & Safety Event at the NEC in Birmingham and says Alex and Nick will be on the RRC stand, HS266, for the three days to answer any questions visitors may have on its HSE training and consultancy services.

Over the three days RRC says it will be offering discounted places on its Birmingham NEBOSH Certificate, Diploma and IOSH courses or if customers want to travel further afield for training, the RRC team can do a deal for other centres.

RRC says at the show will be its new NEBOSH National and International Environmental Diploma's and the NEBOSH Process Safety Management Certificate.

Expanded product portfolio

BSRIA INSTRUMENT SOLUTIONS reports it has recently added the new TSI PortaCount respirator fit tester to its hire and sales portfolio, providing users with the ability to easily undertake the testing of full and half face masks, SCBAs, and disposables. Designed to be run from a tablet or PC these fit testers provide a consistent and objective testing experience across all respirator types.

The company says the new PortaCount models are packed full of practical features such as direct connection to your PC or tablet using WiFi, and an easy to use software package with a FitCheck mode that helps users achieve a better fit for respirator wearers more quickly.

Fuel cleanliness monitor

FILTERTECHNIK says its Particle Pal is a self-contained portable measuring system that gives ISO, NAS and SAE Cleanliness readings and the option of water content analysis for oils and/or diesel fuels, complete with a re-chargeable battery, high pressure internal gear pump and controlled flow rate. Whether on-site or in the laboratory, the Particle Pal can provide cleanliness readings in real time to allow an Engineer to fully understand the condition of their oils or fuels.

The FS9V2 units now have a single LCD display showing all the connected sensors in real time. Filtertechnik have added an internal memory for capturing data with a simple USB data transfer of results that can be printed.
