

RRC's Short Courses

RRC's Short Courses are designed for In-Company delivery. They can be adapted to meet the specific requirements of your organisation and can be delivered in many languages. Below is a summary of the general course content and aims. Contact us if you would like to discuss any adaptations that would benefit your organisation.

CDM - Course Summary

RRC's Construction (Design and Management) Regulations (CDM) Short Course covers the statutory framework for the management of health and safety in construction. CDM places duties on everyone involved with construction work including clients, designers, professionals, main and subcontractors, and site workers. They support and interact with a number of other key pieces of construction-related safety regulation.

The course is ideal for:

- HSE practitioners
- Those involved in construction
- Those affected by the CDM framework

Course Aims and Objectives

The **RRC CDM Short Course** is designed to cover the following topics:

- Hazard management and risk assessment on site
- Construction (Design and Management) Regulations (2015)
- Overview of duties (client, designers and contractors)
- Principal contractor duties and the Construction Phase Plan
- Domestic clients
- Design Techniques and RAG lists
- Legal framework that produced CDM and its background
- Relevant CDM case laws

Course Duration

1 Day (4-8 Hours)
